

# HUNTER - MT SERIES TEFLON EXPANSION JOINTS

## QUALITY

Unlike standard solid Teflon or Elastomeric type Expansion Joints, if process upset conditions exceed 500F, Hunter MT series joints will maintain pressure and temperature capacity up to 1200 F long enough to accommodate system shut down and replacement.

## CONSTRUCTION FEATURES

Hunter MT Series joints are PTFE or FEP Teflon tube formed into a Stainless Steel, Inconel, Monel or Hastelloy corrugated tube.

Flanges are Floating Type (150#, 300# or Metric). Available in Carbon Steel, Stainless Steel, or Teflon coated to meet your specifications.
